**SILICA-SODA-LIME GLASS COMPOSITIONS  
AND THEIR APPLICATIONS**

**Filed by: SAINT-GOBAIN VITRAGE**

**ABSTRACT**

The subject of the invention is a glass composition of the silica-soda-lime type, intended for the manufacture of substrates or sheets, the said glass composition having a  $\phi$  coefficient of between 0.50 and 0.85 N/(mm<sup>2</sup>.°C) and a working point of less than 1200°C.
